

Michela Sorrentino

Artist Statement

Sorrentino works with unusual combinations of colour juxtaposed with dramatic marks and unique symbols. Layer upon layer of her intuitive mark making often express narratives or circumstances of every day life.

Mostly self taught; Sorrentino explores abstractivism using her strong intuition and bold sense of design. Many of her paintings are built through a process of subtle narrative using stream of consciousness writings and snippets of inner conversations blending recurring patterns with storytelling.

Making her marks and gestures quickly on the surface enable her to put her more logical and critical voice aside while tapping into her more spiritual and intuitive mind.
